

IT314: Software Engineering

G17: StaffGrid

Requirements not implemented

- **Performance Tracking**

Monitor and evaluate employee activities based on predefined metrics to assess productivity and identify top performers.

- **Salary and Bonus Calculation**

Calculate salary and bonuses dynamically based on employee roles, performance, and attendance to ensure fair and transparent compensation.

- **Payment Gateway Integration**

Implement a secure payment gateway to process salary payments efficiently, maintaining a record of all transactions for reference.

- **Face Recognition for Attendance**

Integrate face recognition technology to automate and secure the attendance process, ensuring accuracy and preventing fraud.
